Faculty Positions in Aerospace Engineering

Among the open positions in the Stephen B. Klein Faculty of Aerospace Engineering, the Center for High-Speed Flight is seeking a faculty member specializing in high Mach numbers flight experimental research. The appointed faculty member will be expected to lead the design, construction, and commissioning of a free-piston shock tunnel, and to direct all related research activities in this field.

The Aerospace Engineering Department, enrolling around 550 undergraduate and 150 graduate students, serves a key role in maintaining Israel's position as a leader in the global aerospace industry. The Aerospace Engineering Department's academic achievements have been recognized globally, with the Department currently ranked 40 worldwide and 12 in Europe according to the 2024 Shanghai Ranking.

Join us

The Aerospace Engineering Department seeks individuals with outstanding potential for research and teaching and will enrich our academic community. Of particular interest are tenure-track applicants at the assistant professor level. However, exceptional candidates will be considered for all ranks.

Candidates will be expected to conduct independent world-class research, supervise graduate students and postdoctoral researchers, teach undergraduate and graduate-level courses, and obtain competitive research grants. Applicants should have earned a Ph.D. in aerospace engineering or related fields.

Submitting an application

A review of applications will be ongoing until available positions are filled. Interested candidates should submit a combined PDF document that includes: (i) a cover letter, (ii) a curriculum vitae including a list of publications, (iii) a research statement, (iv) a teaching statement, and (v) contact details of at least five references. Send applications by email to:
